

Where blind execution happens

Gemini 3.7 Flash · each tested cell shows executions out of 3 seeds

18/46 holes activated on at least one seed · 8/46 on all three

	Unchecked self-report	Unenforced limits	Undelivered punishment	Rule-order / precedence	Meta-rule exploits	Information asymmetry	Resource conversion	State reset / refresh	Resource duplication	Turn-order / timing	Phase-boundary crossing	Terminal-condition rushing	Objective substitution	Sacrificial play	Board-state poisoning	Denial / grieving

Grey = absent or excluded cell. White 0/3 = a tested mechanism with no unaided execution.

Fixed native referee opponents. No semantic discovery labels or live cross-play claims are used.
