

Does explicit reflection improve repeated-play discovery? · PROVISIONAL

Same revised 45 holes · 3 seed chains · 4 plays · full visible history in both arms · no answer-key hints

Cumulative credit = OR of engine activations within each hole × seed chain. Rising cumulative coverage alone does not demonstrate learning.

Same initial state resets each episode; no cross-game memory. Qwen medium; others high. Only fully scored 135-opportunity points are plotted; partial data remain in CSVs.
