

Which hole types does Gemini exploit?

Gemini 3.7 Flash · 49 engine-side holes · 19 editions · 3 seeds · no reflection

Blind: 45/147 target-seed trials (31%) | **Hinted: 95/102 previous misses (93%)**

Hints reveal one mechanism in a fresh episode. The right panel tests only blind misses; it is not an equal-budget comparison.

“Excluded” means no cells of that type remain after removing the 11 scripted-policy mechanisms. Execution is not verified understanding.
