

Fixed primary method: combined_logistic_both
Paired Brier improvement over ordered-context baseline · green better / red worse

Prospective frozen forecasts
12/12 displayed cells available

G = canonical game-shape groups; original all-method common support.

CI > 0 / < 0 / spans 0 describes the saved paired 95% interval; CI NA = unavailable.

Intervals are descriptive, unadjusted for multiplicity, and conditional on fixed fitted forecasts. Colors saturate at ± 0.35 ; printed values are exact to rounding.
